## FRESH MIX Whitening novel method based on separating active natural ingredients

AGAS whitening is the only available innovative product today in the market, which has successfully utilized scientifically approved natural whitening and anti-aging ingredients by using the pharmaceutical scientific method FRESH MIX that contributes a powerful synergy between the various ingredients that highly increases the efficiency than each ingredient separately.

AGAS Whitening enhances de-pigmentation by various mechanisms that reduce the production of melanin. By dividing the active ingredients into two components that allow retain the stability of each whitening ingredient for a longer period.

The formulas activate only in "real time" once both the Activator and Gel Exfoliator are applied on the skin. This FRESH MIX method prevents future product oxidation when opening the product at the first time and allows the following patients to enjoy a quality treatment like the first one.

### Dunaliella seaweed AGAS solution to overcome Anti-aging process

A part of the aging process is dark skin and pigmentation. One of the things that leads to those skin factors are loss of humidity and reduce of anti-oxidant level. The fascinating Dunaliella seaweed, a unique algae originating in the Dead Sea consists of a tremendous array of minerals, proteins and Lipids which are extremely important for nourishing and revitalizing skin cells and prevent anti-oxidation process.

### AGAS and devices synergistic effect secret

The combination of devices and AGAS accelerates the process of new cell formation and effects the synthesis of melanin from two different angles and this is the secret behind its synergy.

Device	Starts with...	Ends with...
VMAX	AGAS Treatment	VMAX
IPL	AGAS Treatment	IPL
RF	RF	AGAS Treatment
LASER	AGAS Treatment	LASER
Dharma ruler / Galvani	After apply the Activator at the first time (before the activation mix with the Gel)
